CHALLENGE

Time for an update

Cundall needs to adapt to local regulations to succeed in global markets. To tailor to the specific admin requirements of Cundall's Qatar office's business policies, Martin was looking for software that would understand their business and adapt to it, not the other way around.

What's more, Martin's team used Excel spreadsheets to manage the business operations. As Excel was unable to operate smoothly with the huge amount of data, the team was also not able to retrieve data for business processes. Furthermore, data had to be synched manually after each use, wasting time and resources within the company. They needed a new way of managing data.

Efficiency and accuracy with ease

With Ninox, Martin has been able to develop the robust database platform needed to build custom processes for Cundall Qatar. On top of that, the solution provides the required flexibility to enhance and revise processes with ease, making it even easier to adapt to the local regulations. They can now manage the operations and end-to-end HR practices of Cundall Qatar, all within Ninox.

With continuous new and revised processes being implemented in Cundall, Ninox acts as the perfect solution to accommodate the business changes in the software solution whenever required smoothly. Adhering to the data privacy policy of their organization, Cundall uses Ninox Server Pro which is the server version of Ninox installed in Cundall's infrastructure.

Key Features

- ✓ Data management
- ✓ Automation
- ✓ Process management

Benefits

With Ninox's real-time data sync, Martin and his team can manage all their projects on Ninox. Everyone can collaborate and work on the latest project version at the same time and in real-time. Ninox has simplified the data and process management at Cundall Qatar with all business administration data updated in one location, making data retrieval and processing more efficient.

Sustainability is also at the core of Cundall's company values. Cundall is committed to creating a sustainable world for future generations and has become the first consultancy in the world to be certified carbon neutral by the Carbon Trust, using Ninox as the application to record, manage and report CO2 emissions of their daily business operation, over 20 offices worldwide.
